

PLYWOODPOL

spring-slats manufacturer

BIRCH AND BEECH
SPRING-SLATS

all-natural and user-friendly products

CONSTANT QUALITY SINCE 2007

We offer a wide range
of birch and beech spring-slats,
which will provide
an optimal comfort for Your clients.

High-class beech and birch veneer guarantees
equally high quality of our products.

We have been consistently paving the ground in this industry,
offering products, that meet even the highest
international standards.

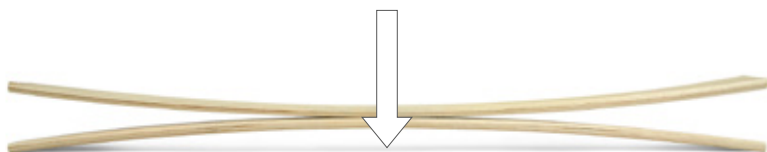

PLYWOODPOL IN CLOSE UP

PLYWOODPOL is one of the biggest manufacturers of spring-slats in Poland. The history of the company dates back to 2007 when we began the first production of spring-slats for beds in Jastrzębie. From the beginning of our activity, we have been devoted to specialisation - we deal solely with the manufacture of spring-slats. We have created from scratch an advanced machine park dedicated for the specific category of products.

Our long-term experience is reflected in the efficiency in the market, which means a fast and efficient fulfilment of orders.

OFFER
for bed manufacturers,
bed frame supports,
upholstered furnitures
